# TRADE MARKS

## AND PACKING

To distinguish their goods in the different export markets, Hults Bruk is using different registered labels, and besides, the name Hults Bruk and the mark  or  are stamped into every tool. In order to insure themselves against fraud, purchasers are particularly requested to examine the goods and see that the above mentioned labels and stamps are on the tools.

The Axes and Hatchets are wrapped in paper and packed in small wooden boxes, each box generally containing one dozen.

The attention of buyers is called to the following points:

- 1:o) That the steel is inserted into the polls in order to procure greatest possible strength and durability.
- 2:o) That only the highest quality of Swedish cast steel is used for all Axes and Hatchets.
- 3:o) That the temper and cutting qualities of all Axes and Hatchets are carefully tested before they leave the works.

- 4:o) That the goods can be had japanned black, blue or red, but; if special orders are not given, all goods will be delivered finished in Black Japan.
- 5:o) That the hatchet no. 54 is always delivered single bevel, if not otherwise ordered.
- 6:o) That any description of axe can be supplied to suit Buyers' requirements.
